DETAILED ACTION

1. The amendment filed October 17, 2005 is entered and claims 1-6 are pending.

Allowable Subject Matter

2. Claims 1-6 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a display panel driving device.

Independent claim 1 identifies a uniquely distinct feature "wherein said row electrode driver circuit, in said reset period, supplies a second reset potential to each of said plurality of row electrode lines, and in said light emission period, supplies a selection potential to the scan line and supplies a non-selection potential to row electrode lines other than the scan line of said plurality of row electrode lines, so that a leak current flows into the capacitive light emitting element driven to emit light. as a drive current via parasitic capacitors of the capacitive light emitting elements connected between said row electrode lines other than the scan line and the light emission column electrode line in said light emission period".

Independent claim 6 identifies a uniquely distinct feature "wherein in said reset period, a first reset potential is supplied to each of said plurality of column electrode lines and a second reset potential is supplied to each of said plurality of row electrode lines, and in said light emission period, the light emission column electrode line is opened and a non-light emission control potential is supplied to column electrode lines

other than the light emission column electrode line of said plurality of column electrode lines, a selection potential is supplied to the scan line and a non-selection potential is supplied to row electrode lines other than the scan line of said plurality of row electrode lines, so that a leak current flows into the capacitive light emitting element driven to emit light. as a drive currents via parasitic capacitors of the capacitive light emitting elements connected between said row electrode lines other than the scan line and the light emission column electrode line in said light emission period”.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishizuka (Patent Application # 20040155842), Ishizuka et al. (Patent Application # 20040119669) and Togashi et al. (Patent Application # 20030184237).

The closest arts, Ishizuka, Ishizuka et al. and Togashi et al. as discussed above, either singularly or in combination, fail to anticipate or render obvious the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
